

## The ideal system for disinfecting areas and surfaces quickly and in total safety!

- **System for disinfection of enclosed areas: bedrooms, offices, meeting rooms...**
- **No chemical products**
- Tested under the **AFNOR NF T72-281** standard for airborne disinfection of surfaces
- **Eliminates at least 99.99% of micro-organisms, bacteria and viruses** (including SARS-COV-2 / Coronavirus)
- The best cost/efficiency ratio available for surface disinfection
- Adapted to all types of surfaces **without side-effects or deterioration**
- A surface disinfection concept offering **confidence and reassurance to your clients and personnel**

### How UV acts

UV-C rays penetrate the heart of the DNA at 254 nanometres, the optimal wavelength for eradicating microorganisms (virus, bacteria, algae, yeast, mould...), disrupting the cell metabolism through to total destruction.

## The advantages of BIO-SCAN®

- A very **fast processing time** and an **immediate effect**:
  - *for a 20 m<sup>2</sup> office, on average 10 minutes*
  - *for a meeting room of 50 m<sup>2</sup>, on average 20 minutes*

*Treatment duration is determined by the configuration and furnishings of the spaces to be disinfected. Our team is there to assist you with the appropriate treatment duration.*
- The device also eliminates all airborne micro-organisms. It will therefore sanitize surfaces and spaces.
- **A certified, tried and tested process**
- **Practical, ergonomic and easy to use** by anyone
- **No chemical products**, no risk to health or the environment
- Economical: low purchase price and fast return on investment

## Technical characteristics

### BIO-SCAN® 3D

2 year guarantee

- **Eliminates at least 99.99% of micro-organisms, bacteria and viruses** (including SARS-COV-2 / Coronavirus)
- Full treatment of a room (floor to ceiling)
- Mobile and can be used by anyone thanks to its wheels
- **Remote control operation**
- Presence of a deflector to concentrate the maximum UV-C rays onto the areas and surfaces to be treated
- A touch screen which displays the UV-C radiation, time of use of the lamps and the system, the number of times used...
- 5m electricity cable from the socket to the machine
- An audio alarm at the beginning and end of each disinfection phase
- A UV sensor detecting any drop of UV intensity in the lamps
- **A movement detector to ensure nobody is in the room** (the lamps are immediately shut down in the event of movement)
- System including: visor, gloves and reactive stickers
- Lamp lifespan: 4000 hours (lamps specially designed for surface treatment, a BIO-UV Group patent)
- **Designed and manufactured in France**
