

AKERON REGUL REDOX

FOR A PRECISE ORP

*Except for the probe

The Redox regulator ensures a continuous measurement of the disinfection needs of the pool by analyzing the Redox potential. With this monitoring, it precisely adjusts the dosage of disinfectant to keep the water clean and healthy.

A large LCD screen: readable indicating Redox is constantly

High-quality professional probes to measure CPR potential

Can be attached to any type of device for water treatment

Simplified navigation for the calibration and control of the locker

Easy installation

AKERON REGUL
